

## How to connect your office laptop using CureMD Secure Remote Desktop Gateway Services

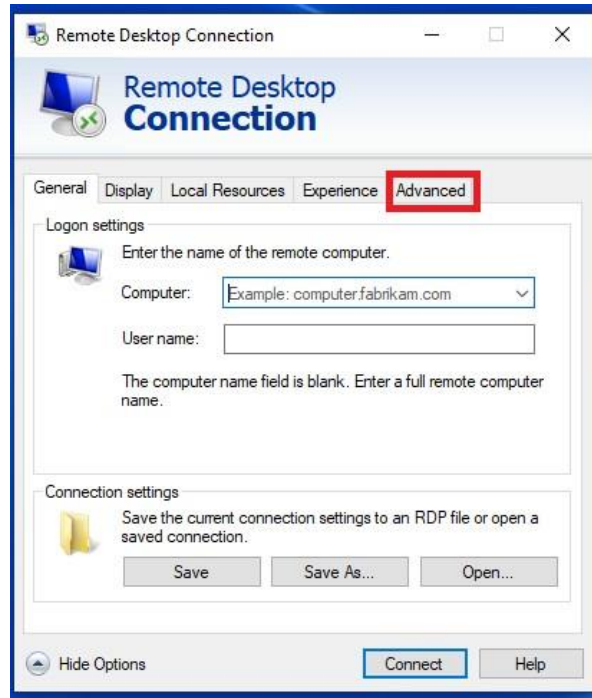

**Step 1:** On your home computer search for Remote Desktop Connection and click open:

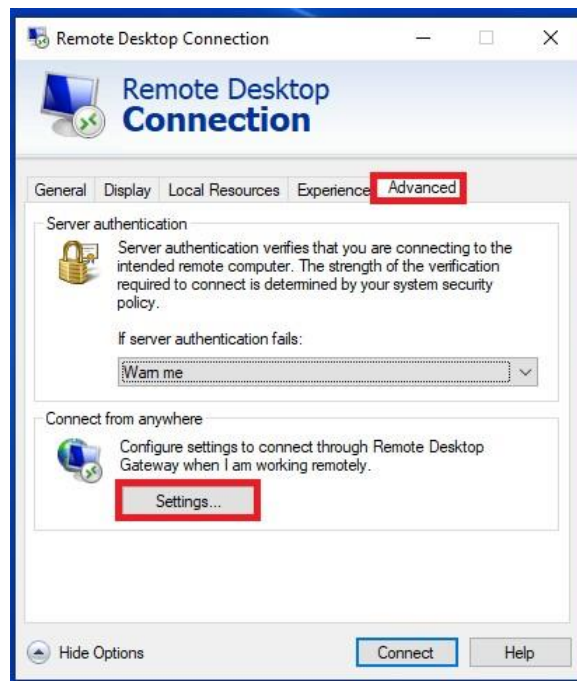

**Step 2:** Click Show Options:

**Step 3:** Click Advanced:

**Step 4:** Click Settings:

**Step 5:** Click **Use these RD Gateway server settings** and enter **rds5.curemd.com**

Click to **check** Bypass RD Gateway server for local addresses

Click to **check** Use my RD Gateway credentials for the remote computer

RD Gateway Server Settings

**Remote Desktop Connection**

Connection settings

☐ Automatically detect RD Gateway server settings

☒ Use these RD Gateway server settings:

Server name:

Logon method:

☒ Bypass RD Gateway server for local addresses

☐ Do not use an RD Gateway server

Logon settings

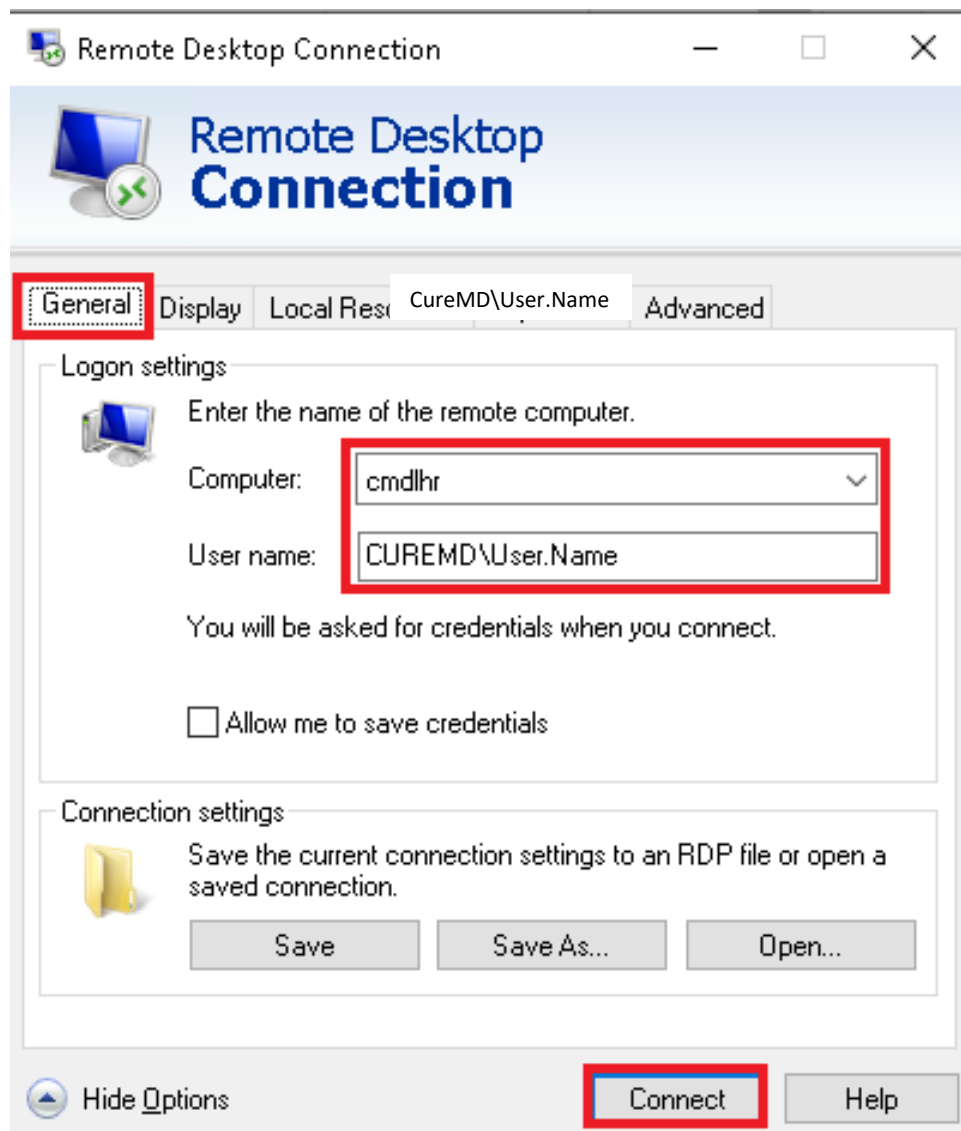

User name: None specified

You will be asked for credentials when you connect to this RD Gateway server

☒ Use my RD Gateway credentials for the remote computer

OK Cancel

**Step 6:** Click General and enter your office Laptop name started with CMDLHR. Enter your domain credentials as CureMD\your Office Windows login name and click Connect.

The screenshot shows the 'Remote Desktop Connection' window. The 'General' tab is selected and highlighted with a red box. The 'Computer' field is set to 'cmdlhr' and the 'User name' field is set to 'CUREMD\User.Name', both highlighted with red boxes. The 'Connect' button at the bottom right is also highlighted with a red box.
